More On Active Surveillance + PCa

Posted April 17, 2013

If you are a Gleason 3+4, you are now a potential candidate for enhanced Active Surveillance with curative intent. Enhanced means the full monty of blood and urine tests, calculation of PSA doubling times, imaging, intermittent hormonal treatment, and diet and lifestyle changes. And regular Avodart or Proscar.

Dr. Myers again castigates the Task Recommendation to not do PSA testing as criminal.

Avodart: BPH + Active Surveillance

Posted April 10, 2013

Numerous clinical trials support effectiveness of Avodart and proscar to slow doubling times without increasing risk high grade disease. Thus adding Avodart to Active Surveillance improves AS as a treatment alternative.
